SUBJECT: Project GUSTO Files

These, as you may recognize, are Mr. Bissell's very own GUSTO files, secreted all this time in his very own safe. I have been going through all Mr. Bissell's personal files, and some of them are so obviously valuable for historical and policy purposes that I am turning them over directly to Doris for Dr. Scoville's retention. On the ~~two~~ ^{three} attached files, however, I am at something of a loss, and I would want to defer to your judgment, particularly since you wrote a good bit of this. My impression is that Dr. Scoville need not hold these, though  basic paper (in the bottom of the " Project GUSTO--Other Systems" file) may be of historical interest.

Would you mind, as a matter of no urgency whatever, glancing at these to see what may be safely destroyed -- or retained by you or Dr. Scoville.

A handwritten signature in ink, appearing to be "R. W." or similar.
